ALL BRANCHES OF THE MARKET  
 ARE OVERTOCKED.

**In Some Cases the Excess of Product Over Consumption is 75 Per Cent—The Growth of the Industry in Recent Years.**

[Special to The Indianapolis News.]  
Gas City, September 6.—The opening of the new season of the gas

the glass market as a glass-working industry which was well known from September 1, presents conditions to both manufacturers and workers, jobbers and consumers, that have never in the history of the American glass industry been so troublesome condition creating every branch of the industry. Overproduction, facilities exceeding demands, an excess of product in the market, the result is the combining which went into immediate and noticeable effect of raising the prices of tableware fairly by percentages ranging from 10 to 25 per cent. Manufacturers in the nation have entered into this agreement, and it is probable that they will continue to do so until the market is healthy again by a further agreement, by which they will be able to produce more fairly than at present. This is the only method which will insure a

[illegible]

of whether strong enough combinations can be effected by manufacturers to keep prices up and production down and give workers employment. If the manufacturers are not able to do this the price of goods will go down and every indication is that the glass industry will go to pieces this year.

The glass industry has seriously outgrown its limitations within the last few years, and this season manufacturers find themselves in a position to produce more than they can sell. The market is flooded and the result has been ruinous prices. It is a case of either the manufacturers must get together and effect October 1, and it is likely that the price of goods will go down. The production will drop 50 per cent. for at least a year. The only way to get the market in fair condition is to get the manufacturers to get together and make a plan that will save the situation, preventing.

The green glass industry is a de-moralized state. Though Saturday was

as numerous and th thrice as many wants. The window-glass industry, the greatest of them all, presents the worst picture. The plants controlled by the present combination operating 90 per cent. of production. Three per cent. are independent producers. The others, operating on the co-operative plan, and the remaining 7 per cent. are manufacturers of a rather inferior quality of the combination, or trust, but still depend on the same few firms for their raw materials. The plants all over the nation, very few are firing their furnaces, and less than 10 per cent. of the plants are firing. The plants of green glass men have been unable to get together. This market has not only suffered from the lack of demand, but also by reason of the firms glass encroaching on the old markets of the green glass men. The market has been so cheap at present.

What is true of the window-glass industry, is true of the lamp, chimney, and

This year the working agreement was the first to provide for reducing the working season from ten to seven and one-half months. Heretofore, all glass plants have been closed for one-half month at the end of the season and resumed operations on the first of September.

tember when the strike was signed by the workers. The strike was the longest in the history of the country, lasting 117 days, until July 1, making it the longest ten-months' season. This year, however, the manufacturers insisted on reducing the working season to only 10 months, and the workers' organization made it impossible for the independent plants to start prior to the 15th of September. The strike was active on by far the largest national association, and the working year was limited from October 15 to the 15th of February.

workers get another ten-months' working year.

In 1880 the window-glass industry of the nation was represented by 676 pots, in 1889 by 1,100 pots, in 1898 by 1,440 pots, and last year by 1,800 pots. The increase in the number of the industry has brought the total number of pots up to 2,122. This means a production of 5,600,000 panes in 1900, and an increase of one-half million by American factories, to which is added the imports from foreign countries.

The cost of window glass in this country is selling high as present, but it is not so high as it was some years ago, and is right at present. Though the Window-Glass Manufacturers Association has been buying, stating that prices would advance with the cost of materials, it has been unable to do so, facts, which show that hereafter there is going to be a surplus of glass in the market. The prices of all kinds will begin to find their way to the market, and the problem of the

**Stationary Engine Co.—The** The sta-

which will run the cost of 6,000,000 boxes as supply. The consumption was at its peak in 1929, when it was 10,000,000 boxes per annum, but last year it fell 100,000 boxes per month short of that. It is a question of whether the consumption during the coming year will not average over the past two years. The paper mills and factories are producing 5,800,000 boxes in seven and a half months, and the consumption will be increased by imports to 6,000,000 boxes. The consumption will be—at 400,000 boxes per month—10,000,000 boxes.

Compassionate Estimates.

The plants operated less than six months during last year and with but 1,930 pots, piled up enough glass to supply the market for a month. They figured that every box of glass will be off of the market by that time. At that rate the plants operating their summer business for a half month will pile up enough glass by next July to supply the markets of the country.

Shot a Woman and Killed Himself.

NEW ORLEANS, La., Aug. 10.—A police watchman Jesse Williams shot and fatally wounded his mistress, Mary Leavelle, at the New Orleans Hotel last morning, and then killed himself. Jealousy was the cause of the tragedy.

**ADVERTISEMENTS**

All advertisements inserted under ordinary conditions.

the columns of the "Wanted" section without manufacturing after July 1 next summer. Then with the same number of plants operating, there would be a half of the plants that the Government should have and they will not operate seven and a half months of the year. The Government has an accumulation of goods that will not be wanted until 1920 if the working year is not shortened to seven and a half months, the production under the old ten months working year would have been of no value in excess of consumption. Whether

[illegible]

figured at 22,000,000 square feet per annum, the maximum during the year ranged from 13,000,000 to 14,000,000 square feet. This is the same as the facilities now stand. It is figured that the new plants will increase the production of about 34,000,000 square feet per annum, an excess of 65 per cent.

Cash as a Flour Market—

Local Prices.

The St. Paul (Minn.) crop report says

the yield from thrashing returns runs

from twelve to thirty bushels of wheat

per acre, and is of good quality and

clean. On some divisions the greater

part of the grain is stacked. The thresh-

ing is about completed. The lowest yield

is reported from the river valley,

where the average is from three and a

half bushels to sixteen bushels per

acre.

The features in wheat to-day have

been the weakness in the Northwest and

the increase in the visible of 1,200,000

bushels.

Corn has been stirred by the appearance

of slight frosts in Nebraska and the Da-

kota, and the prediction of light frosts

for Iowa, Nebraska and Kansas. A

Minnesota message reads: "Armour

is picking up all the cash wheat he can

get hold of."

To-day's Broomchall says: "Specu-

lation is dormant. The weather is fore-

cast. Cheap offerings of American spring

wheat are depressing prices. Danubian

and Russian wheats are sparingly

offered. The foreigner who has weather

in England and France."

Receipts of wheat to-day at Chicago

are small, as compared with a year ago.

Northwestern receipts are small. Dis-

counts which brought Chicago nearly

1,100 cars last year were 90c wheat,

most of which were bought by Armour

to deliver to the army. The weather

The weather. Bureau forecast for

Wednesday is for light frosts in Iowa,

Nebraska, Kansas, Minnesota, Wisconsin

and the Dakotas. Cooler weather in

Illinois, Indiana, Missouri and Michigan.

This forecast is not as disturbing as it

was feared it would be, as traders have

been getting ready for it.

Grain Stocks.

[By O. D. Weaver & Co.'s Wire.]

The Minneapolis Market Record says:

"Minnesota is thrashing from 10 to 25

bushels, and will average altogether

about 15 bushels to the acre, making

a total crop, approximately, 100,000,000

bushels. Returns are not so full from

the South and South Dakota as last year,

such as are received justify previous con-

clusions that the crop of the State is

above 300,000,000 bushels. If farmers

hold back their wheat, as they now seem

to be doing, the crop of the State will

be much more than sufficient to supply

the needs of the country."

World's wheat shipments: America

3,857,000 bushels; against 3,565,000 bushels

last week and 3,533,000 bushels; Russia

and none; India 4,000,000 bushels, against

3,333,000 bushels; against 3,333,000 bushels

velop, but indications seem to favor a

small increase over the present. There

will not be many cattle fed next win-

ter as there were last winter; that seems

to be an assured fact. Many Ameri-

can feeders have had an experience that

has made them sick of the business, and

unless corn goes very low it will be

hard to induce them to feed it to cattle

and to winter cattle. The average of

the range of much higher grade than last

season, for even those fed of common

cattle last year, if they feed again, will

want to feed cattle that are of a higher

grade than last year. The quality of the

little fact has much to do with the

feeling among feeders that feeders

are too high.

Primary Markets.

Primary market receipts of wheat were

3,053,000 bushels, against 2,405,000 bushels

the corresponding day of last year.

Shipments received 1,928 cars wheat

and Duluth 865 cars, a total of 2,803 cars,

against 2,389 cars the corresponding day

last year.

St. Louis: Receipts—Wheat 25,000 bush-

els, against 25,000 bushels; corn 75,000

**Treat & Son's Fifty-fourth**  
South Avenue, Glasgow

fifty-fourth semi-annual display of women's imported woolsens, for the winter wear, was made to-day by Treast & Son, 28 North Pennsylvania street. The usual exhibit of prevailing novelties for fashionable are shown, specific mention of which will be made to-morrow. The display is attracting attention for the new designs in fabric, and ushering in the season with assurances of offerings of Mr. Treast & Son, choice from which to select their autumn
